

# Japan Network Infrastructure Strategies (Japanese Version with Key English Language Reports)

---

As both service providers and enterprise networks continue to grow in scale and complexity, network availability, reliability, efficiency, and faster speeds become critical issues for effective network design and planning. *Japan Network Infrastructure Strategies (Japanese Version with Key English Language Reports)* service provides a comprehensive, in-depth analysis of Japan's network equipment market. For each market segment covered, this service provides key trends, competitive analysis of leading equipment vendors, market analysis and forecasts, and essential guidance. In 2025, this service will focus on the analysis of datacenter networking and datacenter network security and provide the analysis of market and technology trends for datacenter networking.

---

## MARKETS AND SUBJECTS ANALYZED

- Router
  - Ethernet switch
  - Wireless LAN
  - Cloud-managed network
  - SDN and network automation
  - Wireless infrastructure
  - Datacenter network
- 

## CORE RESEARCH

- Japan Enterprise Networks Forecast
- Japan Networks Market Share
- Japan Carrier Network Infrastructure Forecast
- Japan Cloud-Managed Network and SDN Forecast
- Japan Networking Enterprise User Survey
- Japan Cloud-Managed Network Market Share
- Japan Datacenter Network and Security Market Analysis
- IDC FutureScape: Worldwide Future of Connectedness 2025 Predictions — Japan Implications

Note: All documents will be delivered in the local language with the exception of up to two market share and market forecast documents, which will be delivered in both English and the local language.

In addition to the insight provided in this service, IDC may conduct research on specific topics or emerging market segments via research offerings that require additional IDC funding and client investment. ## KEY QUESTIONS ANSWERED

1. What issues must enterprise users address about their own networks?
  2. How are network operators modernizing the network infrastructure?
  3. How can new operation management approaches in enterprise network market become mainstream?
  4. What does the enterprise network infrastructure need to solve the challenges?
  5. What are the key factors for success in the maturing network equipment market?
- 

## COMPANIES ANALYZED

This service reviews the strategies, market positioning, and future direction of several providers in the network infrastructure market, including:

ALAXALA Networks, Allied Telesis, APRESIA Systems, Arista Networks, Cisco Systems, Fortinet, Fujitsu, Hewlett Packard Enterprise, Juniper Networks, NEC, Nokia, Yamaha
