

# Japan Network Infrastructure Strategies (Japanese Version with Key English Language Reports)

AN IDC CONTINUOUS INTELLIGENCE SERVICE

As both service providers and enterprise networks continue to grow in scale and complexity, network availability, reliability, efficiency, and faster speeds become critical issues for effective network design and planning. IDC's *Japan Network Infrastructure Strategies (Japanese Version with Key English Language Reports)* service provides a comprehensive, in-depth analysis of Japan's network equipment market. For each market segment covered, this service provides key trends, competitive analysis of leading equipment vendors, market analysis and forecasts, and essential guidance. In 2023, this service focuses on the open networking market as well as the cloud-managed network solution market.

## Markets and Subjects Analyzed

- Router
- Ethernet switch
- Wireless LAN
- Industrial network
- Network virtualization and automation
- Wireless infrastructure

## Core Research

- Japan Enterprise Networks Forecast
- Japan Networks Market Share
- Japan 5G Network Infrastructure Forecast
- Japan Cloud-Managed Network and NaaS Forecast
- Japan Networking Enterprise User Survey
- Japan Industrial Network Equipment Forecast
- Japan Network Virtualization and Automation Forecast
- Japan Network Virtualization and Automation Market Share
- Japan Open Networking Market Forecast
- IDC FutureScape: Worldwide Future of Connectedness 2023 Predictions — Japan Implications

Note: All documents will be delivered in the local language with the exception of up to two market share and market forecast documents, which will be delivered in both English and the local language.

In addition to the insight provided in this service, IDC may conduct research on specific topics or emerging market segments via research offerings that require additional IDC funding and client investment. To learn more about the analysts and published research, please visit: [Japan Network Infrastructure Strategies \(Japanese Version with Key English Language Reports\)](#).

## Key Questions Answered

1. What issues must enterprise users address about their own networks?
2. How are mobile operators deploying the network infrastructure for 5G?
3. How can new operation management and consumption models in enterprise network market become mainstream?
4. What are the demand trends, requirements, and preferences of corporate end users for their networks in Japan?
5. What are the key factors for success in the maturing network equipment market?

## Companies Analyzed

This service reviews the strategies, market positioning, and future direction of several providers in the Japan communications networks market, including:

ALAXALA Networks, Allied Telesis, APRESIA Systems, Arista Networks, Cisco Systems, Fortinet, Fujitsu, Hewlett Packard Enterprise, Juniper Networks, NEC, Nokia, VMware, and Yamaha.
